DETAILED ACTION

This Office action is in response to applicant's amendment filed on 03 November 2005.

Allowable Subject Matter

1. Claims 1-8, 10, 21 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-8, 10, 21 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method of forming an antifuse on a semiconductor substrate that includes implanting nitrogen into a first portion of the substrate that corresponds to the antifuse combined with implanting nitrogen into a second portion of the substrate, wherein oxide layers are subsequently formed over both the first and second portions using the same wet oxidation step and the thickness of the oxide layers corresponding to the first and second portions are different.
